

## SEL INOX DRUMS NEW

SEL INOX, counter balanced stainless steel stacker with  
ROTATING DRUM HOLDER

### Performance, safety and stability, hygiene and easy way of cleaning

The small, comfortable and manageable counter balanced forklift is ideal for those who need to move drums in small spaces. Entirely designed in stainless steel to ensure hygiene and easy way of cleaning.

#### Its Strengths

- **Hydraulic grippers** - drums diameter 400/600 mm with 360 ° rotation.
- **Frame** - "B" dimension 880 mm and nominal capacity 300 Kg.
- **Duplex and Triplex masts** - With lift heights up to 5200 mm.
- **New Tech** - LATEST generation of AC power and Can Bus technology.
- **New Traction Motor** - 2000 W for optimal performance levels, better reliability and greater protection.
- **New Expanded Frame** - By optimizing access to the components, we have designed the opening from the front of the machine and no longer from the side, to reduce damage from bumps and to reduce the possibility of water or other infiltrations.
- **Swivel Castor wheels** - Swivel castors better protected because fitted on the inside of the truck's frame and also more accessible thanks to the new container space.
- **Double Protection** - double protection of the electric steering to reduce water infiltrations.
- **Protected Hour counter** - Protected and hermetic to guarantee the best cleaning possible without any infiltrations.
- Proportional controls for raising and lowering the forks **located on the push button control box**;
- **Tiller arm and drive wheel** positioned in the centre for better ergonomics and visibility;
- **The push-button control box in corrosive resistant plastic** with mould fitted control buttons **totally in stainless steel** and the new IP67 protected microswitch.

#### On request:

- Electric steering,
- Lifting with total free travel
- Tilting on the mast,
- Cold store execution.

✓ **LOAD CAPACITY UP TO 300 KG**

✓ **SPECIAL DIMENSIONS AND CONSTRUCTIONS UPON REQUEST**
